The Perfect Property for a Residential Development or for the Ultimate Private Estate...

\$ 360,000

This beautiful property is located in the foothills of San Bosco de Heredia and offers **12,000 square meters** (almost 3 acres) of land divided by a stream into two parts. The front part already has a BBQ rancho built and is perfect for locating various common area recreational facilities and a home or two. Across a lovely bridge is the larger part where you could easily build 6-12 homes and behind that there is a new home of 100 square mts. for a caretaker. There is plenty of water, own and municipal plus electricity. There are over 300 producing fruit trees on the property and about another 5000 sq. m² of adjoining land can be bought.

Nice quality neighbors all around... Perfect !
